Bottom

Calibration Directions:

1. Use the arrows above to adjust the location of each of the four dotted red lines.
2. Make the red lines form a perimeter around the registration marks.
3. Ensure the red lines are as close to the marks as possible (see example below).
4. Once you have calibrated the document, click [Save Settings] to return to scanning.

You're Done!

Start scanning and view the results in Data Director
